

### GuestDriver.com MX-5 GT

Eurosport Racing (Joliet, IL), contracted by GuestDriver.com and building three 2016 MX-5s for GT class racing, #55/65/75. Several companies are participating in the design/build since many of the parts employed are non-existent today. Examples include: suspension components, hardtop (currently unavailable from Mazda), a roll cage design compatible with hardtop; and numerous others.

MiataCage (Portland, OR) is currently designing a SCCA/NASA approved roll cage compatible with hardtop which is currently in design by DG Motorsports of Oceanside, CA. JRZ Suspension Engineering (Netherlands) is designing 2 way adjustable coil over shocks. Brembo Brakes braking system; 17x9 wheels by Advanti Racing (purchased through Tire Rack); 245/40x17 tires by Hoosier Racing Tires (Lakeville, IN).

These cars will be designed for endurance and sprint racing as well as being used for performance driving events put on by GuestDriver.com.

Major sponsors include: ALM Positioners (Rock Island, IL), Hawk Mazda (Joliet, IL), Braille Battery (Sarasota, FL), TraqGear (Rincon, GA) and Pro-System Brake ( Mooresville, NC).

We believe this to be the first independent effort (NON FACTORY) to build the New 2016 MX-5 platform into a race car for road racing.
