**Subject** A group driving experience

As a gearhead (self admitted and commonly known), I was extremely anxious to experience the 2 days of instruction and driving. To take in the atmosphere at the track; the cars, the drivers, the pits, the clubhouse, the classrooms, go-kart track, skid-pad, and camaraderie of everyone there was extremely satisfying. The driving portion was only a part of the overall great experience. My enthusiasm had to be kept in check when I returned home as not to talk anyone's ears off...my wife asked me not to let loose on anyone unless they asked me about my trip. ( I figured out how to bait my potential listeners!) Learning about car control and cornering properly was my big take-away. The instruction was easy to understand in the classroom and then to be able to practice what you learned immediately on the track was awesome. I would like more!!!
